### **Step 1: Create a New Document**

Open Adobe Illustrator and create a new document. Set the document size to 800px by 600px and the color mode to RGB.

### **Step 2: Import the Practice Files**

Download the practice files from the link at the end of this article. Unzip the files and import them into your Illustrator document.

### **Step 3: Create the Body**

Use the Pen Tool to create the basic shape of the Pokemon's body. Start by drawing a circle for the head and then add an oval for the body. Connect the head and body with a line.

### **Step 4: Create the Head**

Use the Pen Tool to create the Pokemon's head. Start by drawing a circle for the face and then add two smaller circles for the eyes. Add a nose and mouth using simple shapes.

### **Step 5: Create the Face**

Use the Pen Tool to create the Pokemon's facial features. Start by drawing two small circles for the pupils and then add two larger circles for the irises. Add a highlight to each eye using a small white circle.

## Step 6: Add Details and Textures

Use the Brush Tool to add details and textures to the Pokemon's body, head, and face. Experiment with different brush sizes and colors to create a unique look for your Pokemon.

## Step 7: Create a Background

Use the Rectangle Tool to create a background for your Pokemon. Fill the rectangle with a solid color or gradient. You can also add a texture to the background using the Brush Tool.

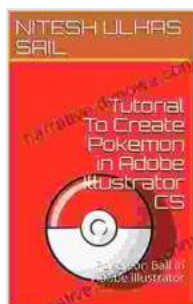

## Step 8: Export Your Pokemon

Once you are finished creating your Pokemon, export it as a high-quality image. Go to File > Export > Save for Web & Devices. Choose the desired file format and quality settings and click Save.

Congratulations! You have now created your very own Pokemon in Adobe Illustrator. With practice, you can create even more complex and detailed Pokemon characters. So what are you waiting for? Start creating your own Pokemon today!
